

Low-Profile heat recovery units specially designed for false ceiling installation (indoors). Aluminium counter-flow heat exchanger up to 92% efficiency (EUROVENT certified), plug-fans with backward curved metal blades and EC motor. Integrated Bypass (100%) for Free-Cooling and Defrost. Suited for airflows up to 2.000 m³/h. Premium pre-configured control system for easy start-up with touch screen. The casing is made of 30 mm self-supporting double skinned panels (mineral wool, 100 kg/m³, thermal conductivity 0,037 W/mK). The inner and outer skin are made from galvanized steel. Easy access to all the components via the bottom access over generously sized sliding-doors. Filters are accessible from the side as well. Rectangular inlet and discharge connections.

Application

Public buildings, offices, stores, schools, restaurants, etc. Well suited for both newly constructed buildings and renovation projects.

Versions

- Left hand / Right hand
- With integrated electric preheater / Without preheater.

Sizes by nominal airflow at 250-300 Pa

800 m³/h, 1200 m³/h, 1600 m³/h & 2000 m³/h.

Options

Integrable preheater module. SLIM units can be ordered with the preheater module mounted from factory or as an accessory to be installed on site.

Accessory modules (post-treatment):

- External modules specially designed for the range.
- Electric battery.
 - Hot water coil.
 - Cold water coil.
 - Reversible water coil for heating/cooling.
 - Direct expansion coil.

TOP's:

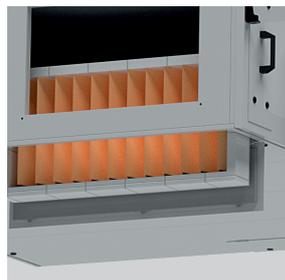

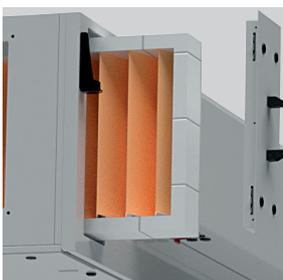

- Sliding access doors - One Man Maintenance.
- Integrated condensation pump - Easy installing.
- Patented tight filter system - Good air quality.
- Patented Module fixation - Clean design.
- Bottom and side access to the filters - Easy maintenance.
- All main components are easy removable.
- Separate electrical cabinet facilitates commissioning and service.

Filter

- M5 (ePM10 50%) filter on the extract air side to protect the heat exchanger.
- F7 (ePM1 50%) filter on the outdoor air side. It is possible to replace the F7 filter by a F9 (ePM1 80%) type on site.
- The filter clogging is controlled by differential pressure switches.

Control system

- Built-in programable control system (Plug & Play).
- Modbus RTU (RS485) and BACNET IP communication protocol.
- Remote touchscreen panel included.

High efficient backward curved fans with EC external rotor motor. Easy access to the fans from the bottom.

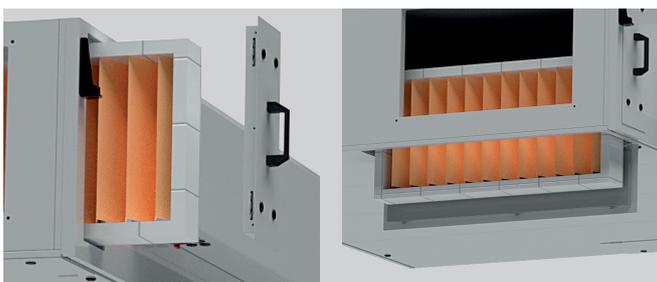

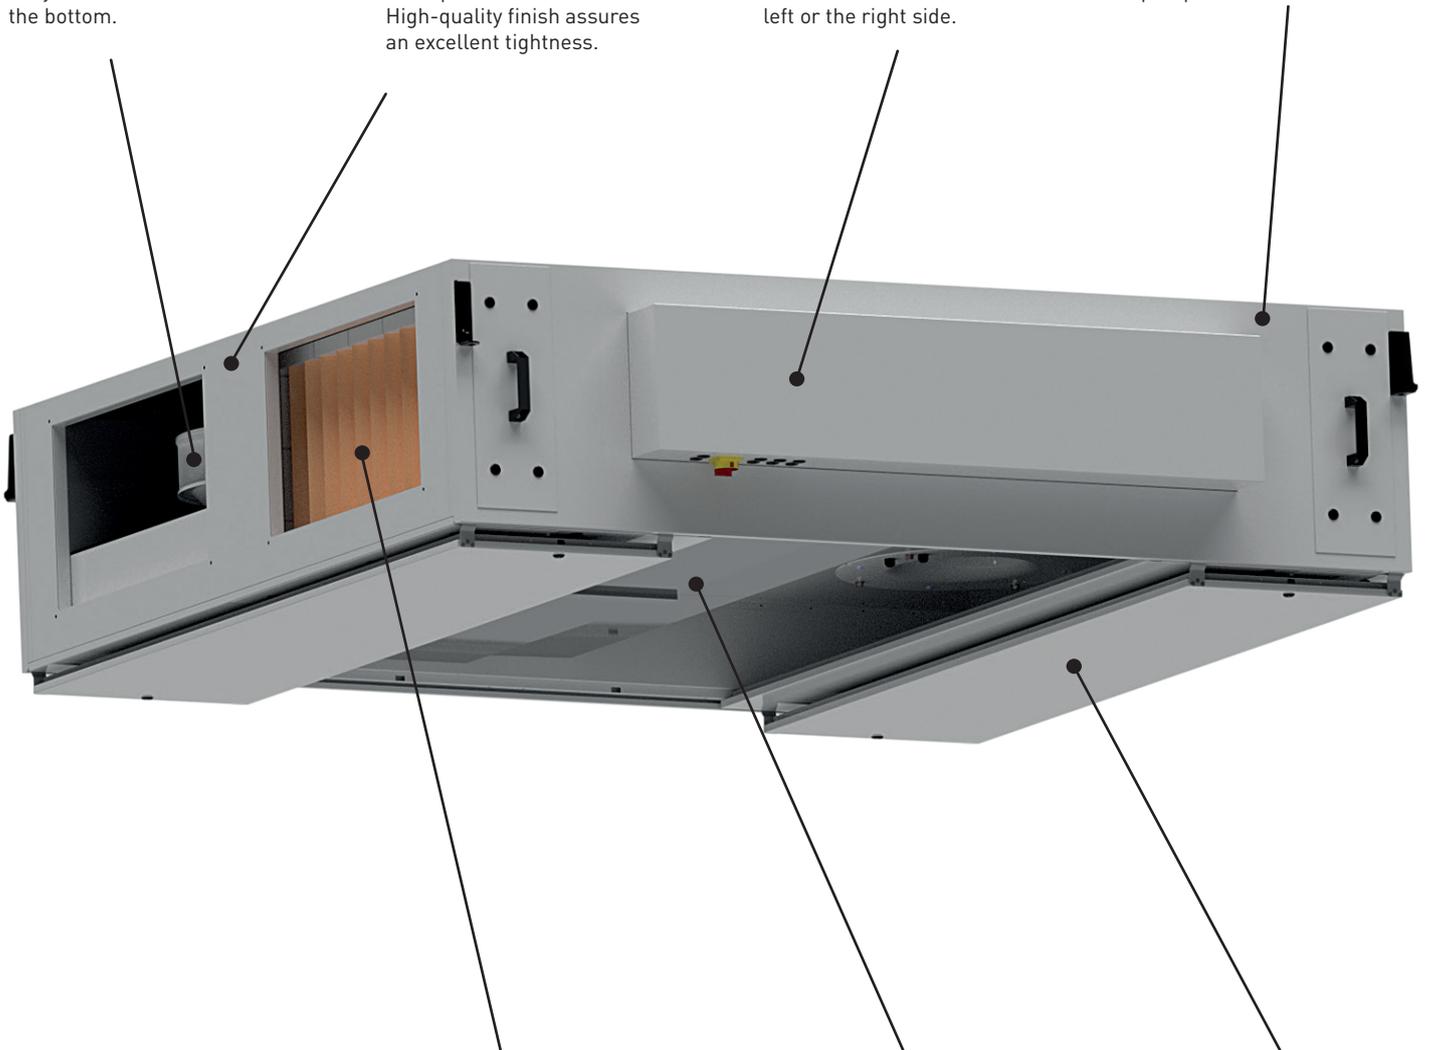

Robust construction with 30 mm double skinned panels with termoacoustic flameproof insulation A1/M0. High-quality finish assures an excellent tightness.

Cabinet with integrated Plug&Play control. Easy access to all components. Versions with control on the left or the right side.

Low profile with lateral condensation connection and integrated condensation pump.

Low pressure minipleat filters. Supply air (F7/ePM1 50%) and extract air (M5/ePM10 50%). Lowest face velocities for higher efficiency. Possibility to install a (F9/ePM1 80%) in the supply air (accessory). Access to the filters from the lateral and from the bottom.

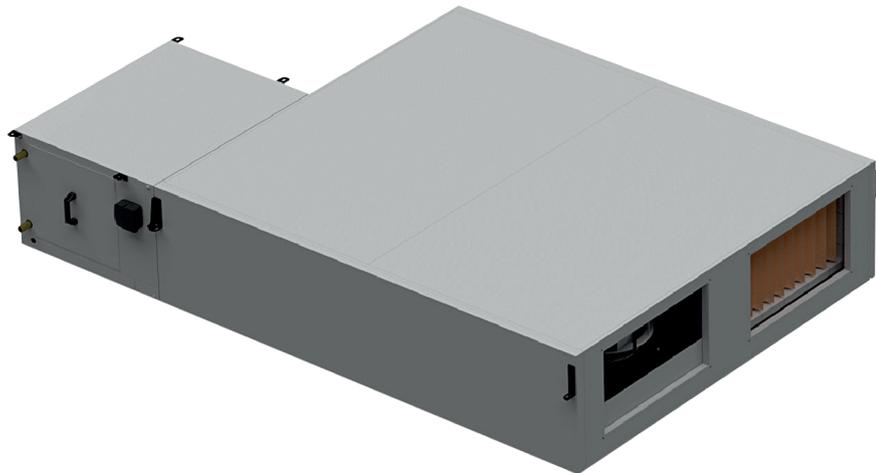

Counterflow heat exchanger (up to 94%) Eurovent certified. Easy access from the bottom for maintenance.

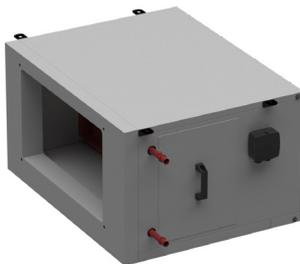

Sliding doors on the bottom for easy maintenance and simple access to all components.

EXTERNAL COIL MODULES (ACCESSORIES)

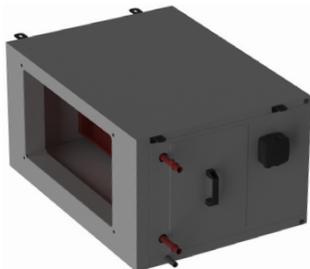

SL-DI Electric heater

- External module that includes an electrical battery.
- Finned heater elements where the fins are made from aluzinc and the tubes from stainless steel AISI 321.
- Built-in overheating protection thermostat with automatic reset at 60°C and manual reset at 85°C.
- Integrated temperature sensor (on site connection to the unit).
- Isolator switch installed on the unit.

SL-DC Hot water coil

- External module that includes a hot water coil. Suitable to be combined with 2 tube-systems.
- 2 rows hot water coil made of copper pipes and aluminium fins.
- Motorized (24V) 3 way valve for proportional (0-10V) control (accessory).
- Anti-frost protection by clamp-on sensor to the return flow pipe.
- Integrated supply air temperature sensor (on site connection to the unit).

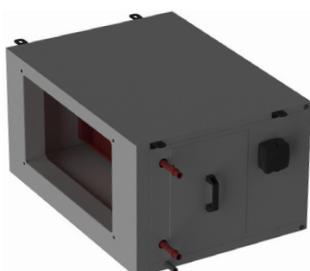

SL-DFR Reversible water coil (Hot/Cold Water)

- External module that includes a reversible water coil. Suitable to be combined with 2 tubes systems, both for heating and cooling applications.
- 3 rows water coil made of copper pipes and aluminium fins.
- Motorized (24V) 3 way valve for proportional (0-10V) control (accessory).
- Anti-frost protection by clamp-on sensor to the return flow pipe.
- With welded condensate tray made of galvanised sheet metal.
- Condensate drain ½" located lateral on the modul. It has to be connected to a siphon (accessory).
- Built-in changeover thermostat (THCO) which controls a mixing valve.
- Integrated temperature sensor (on site connection to the unit).

SL-DF Cold water coil

- External module that includes a chilled water coil. Suitable to be combined with 2 tube-systems.
- 5 rows water coil made of copper pipes and aluminium fins.
- Motorized (24V) 3 way valve for proportional (0-10V) control (accessory).
- With welded condensate tray made of galvanised sheet metal.
- Condensate drain ½" located lateral on the modul. It has to be connected a siphon (accessory).
- Integrated temperature sensor (on site connection to the unit).

SL-DX Direct expansion coil

- External module that includes a direct expansion coil for R-410A.
- Allows the integration of the unit in air conditioning systems of the main existing manufacturers.
- 4 rows coil made of copper tubes and aluminium fins.
- Designed to work in evaporation or condensation mode.
- With welded condensate tray made of galvanised sheet metal.
- Condensate drain ½" located lateral on the modul. It has to be connected a siphon (accessory).
- Integrated temperature sensor (on site connection to the unit).

PLUG & PLAY CONTROL FUNCTIONS

MAIN ELEMENTS

Control Cabinet on the unit

Isolator switch

Wired control and components integrated in the cabinet

Easy access from the side (Left or Right version)

FUNCTIONS

AIRFLOW CONTROL

Three adjustable speeds

Reduced speed, normal speed, extra speed

Three adjustable working modes

CAV constant air volume

Fan speed is adjusted in dependency of the pressure lost of the filter in order to maintain the adjusted airflow

Each fan is connected to a pressure transmitter which allows to enter different setpoints to each fans

VAV variable air volume

Fan speed is adjusted in dependency of a external 0-10V signal. P.e. CO₂ sensor, humidity sensor (accessories)

COP constant pressure

Fan speed is adjusted in dependency of a signal which comes form a external pressure sensor (accessory)

The fans maintain the adjusted pressure in the duct, increasing the speed when pressure falls or decrease speed when pressure rise

Time programming

Weekly timer, holiday periods

Boost function

Via external contact

Remote ON/OFF

Available contact to connect an external ON/OFF switch

TEMPERATURE CONTROL

Sensors

Outdoor air temperature sensor (ODA)

Supply air temperature sensor (SUP1)

Extract air temperature sensor (EXT)

Exhaust air temperature sensor (EHA)

Clamp-on sensor for frost protection of water coils (SL-DC, SL-DFR)

Change over thermostat installed on water inlet pipe (SL-DFR)

Supply air temperature sensor (SUP2) already integrated in all the post-treatment modules

Frost protection of the heat exchanger

Electric pre-heater (optional), speed reduction of the supply fan, bypass activation

Bypass

100% automatic proportional bypass used for free-cooling in summer time and defrost in wintertime

Four temperature control modes

Supply air temperature control

Extract air temperature control

Outdoor compensated supply air temperature control

Summer/winter control

UNIT MONITORING & PROTECTION

Filter clogging
Malfunction of connected sensor
Malfunction of fan
Malfunction of condensation pump
Heat exchanger
Fire alarm
Smoke alarm
Frost protection for water coils
Overheating electric battery
Heat exchanger efficiency
Alarm history

ACCESSORY MODULES

Electric postheater battery (SL-DI)

Proportional control (PWM), for electric heater module

Water coils (SL-DC, SL-DFR, SL-DF)

Contact for motorized 3 way valve 0-10V

Direct expansion coils (SL-DX)

0-10V output for cooling or heating demand

External damper

Contact for spring return damper actuator (on/off)

COMMUNICATION

Remote touch screen panel
MODBUS RTU (RS 485)
BACNET IP
Websserver

SPECIFIC ACCESSORIES

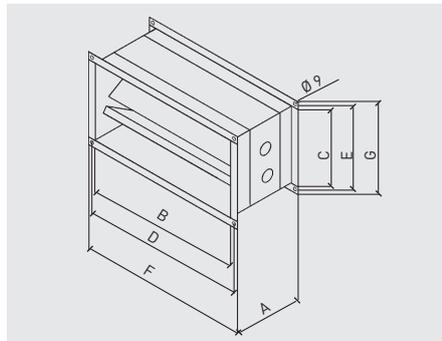

SLIM units are complemented with a wide range of air treatment accessories, specifically designed to integrate in the supply.

Heat recovery unit model	Connection (h x w)	M5 spare filter	F7 spare filter	F9 filter (to replace F7 filter)	Rectangular flexible connection	Antivibration mounts (4 pieces kit)	Isolation dampers	On-off damper actuator (spring return)
SLIM 800	400 x 200 mm	AFR-SLIM 800 M5	AFR-SLIM 800 F7	AFR-SLIM 800 F9	IAE-200	KIT AM CAD-COMPACT / SLIM	IJK-200	LF-230 S
SLIM 1200	500 x 250 mm	AFR-SLIM 1200 M5	AFR-SLIM 1200 F7	AFR-SLIM 1200 F9	IAE-225	KIT AM CAD-COMPACT / SLIM	IJK-225	LF-230 S
SLIM 1600	600 x 300 mm	AFR-SLIM 1600 M5	AFR-SLIM 1600 F7	AFR-SLIM 1600 F9	IAE-285	KIT AM CAD-COMPACT / SLIM	IJK-285	LF-230 S
SLIM 2000	600 x 350 mm	AFR-SLIM 2000 M5	AFR-SLIM 2000 F7	AFR-SLIM 2000 F9	IAE-315	KIT AM CAD-COMPACT / SLIM	IJK-315	LF-230 S

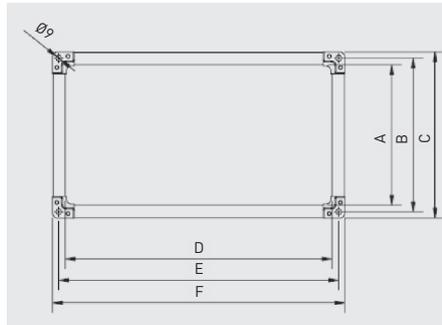

IJK
Manual motorisable dampers. Supplied with standard rectangular flanges. Manufactured from galvanised sheet steel. Fitted as standard with removable handle. Shaft diameter: 10 mm.

Model	A	B	C	D	E	F	G	Weight (kg)
IJK-200	162	400	200	420	220	440	240	3,3
IJK-225	162	500	250	520	270	540	290	4,2
IJK-285	162	600	300	620	320	640	340	5,4
IJK-315	162	600	350	620	370	640	390	5,8

IAE
Rectangular flexible connection.

Model	A	B	C	D	E	F
IAE-200	198	220	240	400	420	440
IAE-225	248	270	290	500	520	540
IAE-285	298	320	340	600	620	640
IAE-315	348	370	390	600	620	640

LF 230 S
On-Off actuator with spring return. Power supply: 230 V 50 Hz.

REQUIRED ACCESORIES FOR EXTERNAL MODULES (WATER COILS)

3 WAY VALVE WITH PROPORTIONAL ACTUATOR

Three way motorised control valve.
Pressure 16 bar.
Rp" internal nut.
Nickel-plated forged brass casing.
Stainless steel valve cone.
Stainless steel shaft.

Average temperatures -10°C...+120°C.
5Nm mounted rotatory actuator.
AC/DC 24V, proportional.
90s/90° valve response time.
DC 2...10V working range.
IP 54.

Heat recovery unit model	3-way-valve for SL-DC modules	3-way-valve for SL-DFR modules	3-way-valve for SL-DF modules
SLIM 800	3WV DN15 KVS1 PROP 24V	3WV DN15 KVS1 PROP 24V	3WV DN15 KVS1,6 PROP 24V
SLIM 1200	3WV DN15 KVS1,6 PROP 24V	3WV DN15 KVS1,6 PROP 24V	3WV DN15 KVS2,5 PROP 24V
SLIM 1600	3WV DN15 KVS2,5 PROP 24V	3WV DN20 KVS4 PROP 24V	3WV DN15 KVS2,5 PROP 24V
SLIM 2000	3WV DN15 KVS2,5 PROP 24V	3WV DN20 KVS4 PROP 24V	3WV DN20 KVS4 PROP 24V

Note: These are only general recommendations that will meet the KVS requirements in a certain installation type. It is highly recommended to select the 3WV through EasyVent Selector.

ELECTRIC ACCESORIES FOR VENTILATION CONTROL

Accessories for Variable Air Volume. VAV by CO ₂ level		Accessories for constant air flow operation CAV	Accessories for constant pressure operation COP
Duct	Ambience		
SCO2-G 0-10V	AIRSENS CO ₂	Airflow transmitters included in the unit (factory mounted)	TDP-S

AIRSENS CO₂

Indoor air-quality control device with a built-in CO₂ sensor. Especially designed to create DCV systems directly used with single-phase or ECOWATT fans, depending on the relay or analogue control output selected.

Main features:
4 working modes:
- Relay output and Modbus (reading).
- 0-10V output and Modbus (reading).
- 2-10V output and Modbus (reading)
- Full Modbus control.

Adjustable set point.
Air-quality level indicator (3-LED diffuser).
Adjustable brightness 3-LED diffuser.

Model	Electrical supply	Power (W)	Relay	Analogue output	Lecture range	IP Protection	Dimensions LxWxH (mm)
AIRSENS-CO2	100-240 VAC 50/60Hz	0,7W	3A 250 VAC	0-10 V 2-10 V	450-2000 ppm	IP30	122x23x89

TDP-S

Pressure sensor.

SCO2-G 0/10V

CO₂ sensor for duct installation. It controls the ventilation depending on the CO₂ levels in the air circulating through the extraction duct. Outlet: 0-10V. Power: 24 VDC.
